## Hardware Algorithm Implementation for Mission Specific Processing

By Jason W. Shirley

Biblioscholar Dez 2012, 2012. Taschenbuch. Book Condition: Neu. 246x189x9 mm. This item is printed on demand - Print on Demand Neuware - There is a need to expedite the process of designing military hardware to stay ahead of the adversary. The core of this project was to build reusable, synthesizable libraries to make this a possibility. In order to build these libraries, Matlab commands and functions, such as Conv2, Round, Floor, Pinv, etc., had to be converted into reusable VHDL modules. These modules make up reusable libraries for the Mission Specific Process (MSP) which will support AFRL/RV. The MSP allows the VLSI design process to be completed in a mere matter of days or months using an FPGA or ASIC design, as opposed to the current way of developing a system which can take 1-2 years to complete. By having the libraries built, the components can be implemented in an FPGA or ASIC design over and over again. The libraries make it possible to make upgrades to weapons systems to meet the ever-changing needs the War Fighter faces. MSP makes it possible to develop various algorithms, including algorithms implemented in Matlab. The MSP libraries were built and tested using TSMC...

### Reviews

*The most effective pdf i ever go through. It is probably the most incredible book i have got study. You wont sense monotony at at any time of the time (that's what catalogues are for relating to if you check with me).*

-- Ahmad Heaney

*Undoubtedly, this is the best function by any writer. This really is for those who statte there was not a really worth reading. Its been written in an exceptionally basic way which is merely right after i finished reading through this book by which really transformed me, change the way i really believe.*

-- Dr. Deonte Hammes DDS
